Dear Reader,

Have you ever felt like some people have a secret guide to life?

Somehow—as if they know the secret passcode—they continually "stumble" into situations most of us never come across. But it happens to

them again and again.

For instance...

- Do you love to travel? How'd you like to do all your traveling—anywhere in North America—for 50 cents on the dollar? It's true—if you know this easy, three-step hack, you'll get two-for-one flights for two years—with no black-out dates, no restrictions during special sales, and without getting treated like airline cattle. In fact, *you'll be treated like airline royalty, including free drinks and special privileges*. Anyone can do it—but most people have no idea this life hack even exists.
- Speaking of travel—maybe 50% off isn't good enough for you? No problem—using another life hack, you can decide where and when you'd like to travel, and then *pick your own price*. My friends who turned me onto this life hack recently took a trip to Cancun for \$1. All-inclusive.
- Cut your utility bill in half—or, even better, get the utility company to pay *you*—without cutting down on your gas or electric use, installing any multi-thousand dollar systems, or spending time shopping between different providers. This is so easy and so simple, everyone should be doing it—but *only those who know to ask get the benefits*.
- Like garden-fresh food, but don't like the work? Hack #64 will show you how you can get other people to grow food for you. In fact, they'll *pay you for the privilege*.
- This next one is so unbelievable, I've been encouraged to not even tell you about it—you'll think I'm making it up. But it's 100% true. If you know this life hack, you can buy a house—and live anywhere you want—for only \$1. Go ahead and be skeptical—I'll introduce you to a friend who did just that in a few moments.

These life hacks—and 130 more of them—are the difference between the "lucky" few who live luxury lives on economy budgets...and everyone else, the people barely scraping enough from their paychecks to pay for necessities.

You can use these life hacks to add tens of thousands of easy dollars to your income—like Alicia S., who used Hack #6 to create an \$80,000 a *month* business. One where other people have to do all the heavy lifting.

Or, you can use them to save on all your living expenses—in fact, using Hack #1, you can own just about anything you can imagine...for free. You'll even get paid to own it. Like Brianna in Seattle, who now has a free motor scooter, thanks to this hack.

In the next twelve minutes, I'm going to show you how you can join them.

Actually, you'll be a step ahead—because, while each of these hacks has been researched and proven by people who are using them today, to make their life better—they've never been brought together in one spot before.

This manual of life hacks is so powerful, getting it is almost like acquiring a super power—one that lets you shape the world to your own wishes.

That's a bold claim, I know.

But, as you'll see, putting these "life hacks" into action is a lot easier than you think.

The only reason everyone isn't doing it, is *so few people* are even aware life hacks like these exist.

In fact, you could live your whole life, and only meet one or two folks who are "in the know."

Those that are have an unfair advantage. And it's one I'll give you, instantly, at the end of this letter.

I'll tell you exactly who I am—and why I want to give away these powerful secrets—in just a moment.

But first, let me share a few more of these life hacks with you right now, so you can see just how powerful they truly are...

Your Own Personal Workforce—For Free

One of the best things about the luxury life is freedom from the mundane.

You have people to do your shopping—to wash your car and pay the bills. There are people to prep your meals, and do the dishes when you're finished. If you don't feel like gardening, you can hire out landscapers.

Heck, if you're tired of the travails of parenting, you can pay folks to take care of that for you too.

But these sorts of luxuries—a complete, private staff!—are only available for the uber-wealthy, right?

Wrong. Not if you use Hack #37.

In fact, if you join one small, exclusive, little-known club, you'll get potential employees literally *beating down your door*.

And the best part—they aren't going to ask you for a dime. In fact, *they're paying for the chance*.

I know that sounds insane. But trust me, it's not.

And there's nothing nefarious going on, either. This is all completely legal, above-board, and good for everyone involved.

In fact, your new workers are generally overjoyed to come help you out. Here's what some have said...

“We really enjoyed our month-long stay in Kathy's unique and beautiful home... We did a variety of tasks for her, including: building her B&B website, updating/managing online accounts (booking.com, Airbnb, etc), looking after her bed & breakfast, cleaning the rooms, cleaning the house, caring for the dogs & horses, housesitting while she was away, groundskeeping, etc... We are happy to call her a friend.”

—Ali & Derek

...volunteering on this farm was one of the best experiences I've had... we fed the donkeys, pigs, and chickens and would water the garden in the mornings...in November, we worked on harvesting the olives from the trees.

—Shelbi

...we couldn't have been luckier!...They were exceedingly considerate when it came to the various tasks we had to do around the house, they were concerned for our welfare... We wouldn't hesitate to recommend.

—Ariel & Becca

Who wouldn't like an extra pair of hands around the house—or ten extra pairs? To help you any way you want? Perhaps they can assist you getting a new business off the ground...or just do all the chores you've been meaning to get to for years, but that just keep stacking up.

You can just find someone else to do the work for you. For free.

Again—this is completely legal. In fact, there's a great reason why so many people are salivating at the chance to help you out.

I show you exactly why that's the case in **The Secret Book of Free Life Hacks**, on page 45. It makes so much sense, you'll be surprised everyone isn't doing it.

But only a select few know *where* to find these willing workers, and *how* to entice them to offer you free labor.

It's all in the book. Which, by the way, I'd like to give you absolutely free.

This book is chock full of simple, head-slappingly easy, hacks just like this. The sorts of things that will have you asking, "Why didn't I think of that?"

The truth is, in each of these cases, a few people have. And they're already using these hacks to great effect.

Like Dan H.—who is using Hack #15 to turn his backyard into a \$50-a-day income stream. That might not sound like much—but, over the course of a year, it can turn into a nifty \$18,250 payday. And he doesn't have to do a thing—just give people his address, sit back, and collect the cash.

And there are plenty of others doing even better using this hack. The most dedicated—if you can call it that, considering you don't have to do a thing—are pulling in **six figures** every year.

The real question isn't whether you can do this or not. There are millions

of people making use of these hacks every day.

The only question you should be asking yourself is: Why aren't I?

What Makes Me So Special?

The answer is simple. The vast majority of people aren't even aware these opportunities exist.

That seems odd, considering there are literally hundreds of thousands of dollars—per person—just sitting out there, waiting to be plucked from the air.

But it makes more sense when you think about the people you know.

How do most of them spend their time?

Are they working boring jobs...drudging through their days...only to collapse in front of the TV every night?

Do they spend their weekends at the movies, in front of that same TV, or—if they're very adventurous—maybe going to a sporting event or concert?

In short—are they tamed beasts? Predictable, boring, color-inside-the-lines types? Even if they didn't start out that way—have they given up to the flow of life, with no say in where that flow takes them?

Odds are, most of the folks you know fit that description pretty well. And when you're a docile, house-broken animal like that—well, the most effective secrets in the world can float right in front of your face, and you won't notice.

It happens every day. In fact, it's probably already happened to you once or twice since you woke up this morning.

If you're happy with that sort of life—I'm going to level with you, **The Secret Book of Free Life Hacks** probably isn't for you.

These tips and tricks are incredibly easy to do, and can lead to life-changing income streams, and luxury lifestyles most folks only dream of.

But—here's the sad thing—a lot of people get nervous when presented these sorts of opportunities. It's like they're scared of success—scared of changing up their comfortable routines, even if it's for the better.

If that's you, turn around now. **The Secret Book of Free Life Hacks** absolutely can alter your life.

Apply these secrets, and your life will improve—guaranteed.

But it will change.

If more time for higher-quality vacations brings up a queasiness...

If the freedom that comes with more money leaves you feeling lost, without guardrails...

If the prospect of starting a new, better chapter in life leaves you feeling like you're stepping out over the abyss of the unknown...

That's ok. That's normal for most people. There's no shame in clinging to the known—the evenings in front of the tube, the weekends spent surfing the 'net.

But if the adventure that comes with unlocking this sort of power excites you, you're going to want to hear about this next hack.

Live Anywhere—For \$1

What I'm about to reveal is next-level stuff, so buckle up.

You see, it's a one-two combo of two different hacks that, when used together, become exponentially more powerful. So powerful, that they'll let you choose where you want to live—and give you your own, personally-selected house right there. For as little as \$1.

Here's how it works.

Thanks to a little-known new government program detailed in Hack #20, there are plots around the country that are being literally *given away* for free.

In Maine and Michigan. In Minnesota and Iowa. Name a place. Odds are, you can claim your free land, *if* you know how to ask.

This isn't even the first time the government has parceled out free land like this. The first time—in 1862—it was called the Homesteading Act, and entire states were given away to homesteaders.

It's happening again today, because America is a lot bigger than you

realize. And, outside of about ten major cities, most of America needs more people.

But this program isn't well-publicized, because no one wants a run on the best spots. During the original Homesteading Act, people were literally killing each other for plots with good soil, or great natural beauty.

No one wants that to happen again. So, this time, the giveaway is being whispered about, instead of shouted.

Now some—but not all—of this land comes with minor caveats. Like the promise that you'll live there, or build there, or improve the land somehow.

That's fine—because that's exactly what we want to do.

Which brings us to the power of combining Hack #20, with Hack #21. Because Hack #21 teaches you how to grab a fully-built house, for as little as \$1.

And how you can put that house wherever you want.

It sounds unbelievable. But that's exactly what Susannah S. did to get herself a huge, beautiful farmhouse that she certainly couldn't have afforded any other way.

In fact, it really could have been free. The previous owner was so eager to give it to her, he would have been willing to pay. But, in order to get a certificate of sale, they had to jack the price all the way up to \$1.

I don't want to give away too much of this Hack, for obvious reasons. Starting with, if this secret gets out, it could crash the entire real estate market...and we already know where that can lead.

So I've got to keep this one under my hat. It's reserved for the few people who grab **The Secret Book of Free Life Hacks** before we run out of copies.

This is one of the most powerful hacks I know. And it's one you can use today. As Susannah says, "That's what we did 15 years ago, and we have a beautifully restored, historic home in a prime location in Northfield, Minnesota."

You can too.

There's So Much More In Your Free Book

The hacks I've already mentioned are just meant to whet your whistle. In total, we've got 135 of these ready to go, for the first group of people that raise their hands and say "Count me in."

It's really that easy. With that simple gesture, you can find out...

- How to take something you already do—watch TV—and get *paid to do it*. Honestly. There's no reason you should be doing this for free, when there are folks out there eager to pay you for your troubles. It's on page 19.
- How to get a brand-new car—for free. Seriously, even if your current car is perfectly good, who wouldn't want a sparkling new model for zero dollars down, zero dollars owed? In fact, it gets better—you'll *get paid* to drive this new one. Sounds insane—but, as you'll see on page 30, it's anything but.
- How *you* can get paid every time *a stranger* buys something online. This is, frankly, an incredible life hack, which has created multiple millionaires. There's no shipping or storage involved, no setting up LLCs or businesses, no creating products or patenting ideas. Simply use Hack #4 to get paid when strangers make a purchase—and you'll make money without doing a thing. Heck, most of the time, you won't even realize anything has happened until the checks come rolling in.

Why Am I Sharing All These Incredible Tips?

It's about time I introduce myself.

Because by now, I'm sure, you're wondering how I know about all these secret life hacks—and why I'm sharing them with you.

My name is Ryan Cole. And I head up a team of experts who are laser-focused on helping folks just like you live better. I'll tell you more about them—and our organization—in just a moment.

But first, I want to show you why it's my passion to share these hacks with as many people as I possibly can.

You see—to put it plainly—when I see what's happening in America today, it blanches my face.

So many people struggling, needlessly. So much anger and fear—for no good reason.

Right now, it feels like the country is pulling itself apart. And, the worse it gets, the more people get left behind.

For the first time in my life, hopelessness seems to be more common than hope. I'm an optimist by nature and I can't stand to see the nation with such a bleak outlook.

It doesn't have to be this way. In fact, there's still plenty of opportunity and fortune, if you know where to look.

I know this, because I've been using a lot of these tips for years, to achieve my personal version of the American Dream.

I'm writing you from the comfort of my brand-new, refinished and refurnished bedroom, which doubles as my office (when I don't feel like sitting at my magnificent, mid-century desk). I enjoy a six-figure salary, earned entirely on my own schedule, without a cubicle in sight.

Later this week, I'm taking a trip to New Orleans to celebrate a milestone wedding anniversary...and I'm not paying a dime.

Indeed, that's just the beginning—only a couple weeks ago, I returned from more than a month living in Ireland, never dipping into my own wallet.

I'm living this well-appointed, luxury lifestyle—while putting away the vast majority of my earnings for an early retirement—thanks to a combination of hacks.

The sorts of tricks that score me free international flights a few times a year...along with multiple easy, passive income streams that add up to a healthy upper-class salary. Without having to put in upper-class hours.

It took me years to figure out how to make these tips work for me. And now, I want to make them work for you.

To be clear—this isn't just about money and luxury, either. In fact, that's only *one* section of **The Secret Book of Free Life Hacks**—out of four.

That's because I know—after plenty of personal trial and error—that money is an important thing, but it's not the only thing.

Money is, after all, only a tool.

The only thing that really matters is independence, and happiness.

Which brings me to Walden Publishing. That's the name of the company I run.

And I run it, not because I need the money (I'm already doing fine). I run it because I believe too many folks are adrift.

The American Dream has been breaking down, and at the same time—not coincidentally—so have American ideals.

The sorts of things that the nation's founders enshrined as the greatest goods. Like freedom, privacy, the chance to be left alone from an intrusive government and make our own, self-sufficient way.

How—in This Crazy World—You Can Gain the Independence You Deserve

The government has been getting more intrusive as time goes on—as are the new powers on the block, the mega-corporations that run so much of our lives.

Americans used to have a can-do attitude and the freedom to make their way. No more.

Now, most Americans are little more than data points in vast marketing plans—nodes of meager salaries designed to get siphoned up by the mega-rich.

I've had enough. And I have a feeling—since you're reading this today, so have you.

That's why I've designed Walden Publishing to be a defense of the true, original American spirit.

The freedom from government tyranny, that inspired Washington and Jefferson.

The ultimate reliance on self, that drove Franklin and Adams.

And the chance to truly pursue personal happiness—in whatever way fits best—as powerfully personified by Henry David Thoreau, exploring

Walden Pond.

That's what Walden Publishing is all about. Independence, as a means to freely pursue happiness.

And that's why **The Secret Book of Life Hacks** doesn't just begin and end with ways to maximize the dollar signs in your bank accounts.

Inside this report, you'll also find things like...

- A four-step technique to *rid* yourself of things you don't need, and make sure that *you own your possessions*, instead of having possessions that own you.
- A simple, incredibly easy way to turn rainwater into the purest drinking water you'll ever taste...so you never have to wonder "What chemicals or poisons is the state putting in my tap water, anyway?" Believe me, the folks in Flint, Michigan would have found this invaluable. I spend large chunks of the year in Baltimore, which has its own lead problems—this hack is a lifesaver.
- The stupid-easy root to grow in your backyard—both as a treatment for many common ailments, and one that comes with a bonus as a cash crop. The best specimens of this root sell for upwards of half-a-million dollars. And once you plant it underground, the only thing left to do is wait.
- How you, for just about zero dollars invested, can create an irrigation system that can compete with the most high-tech and expensive out there. If you have any interest in growing your own food—or just having a beautiful garden—this hack is a must-have.
- How to build your own zero-energy oven—perfect for cooking up delicious, safe food in emergencies, or simply as a way to save money on your utility bill.
- How you can get paid to access the very best, cutting-edge healthcare. That's right—forget about five-figure doctor's bills. This hack can get you treatment that isn't even known to most folks yet—and get you a check cut at the same time.
- The pet that—instead of costing you money in food and expensive vet bills—can actually turn into a \$500—\$1,300 a week salary. That truly is man's best friend.

I'm only scratching the surface here.

In fact, I believe this is one of the most valuable books ever created. You just never find these sorts of practical tips and hacks put in one place like this.

A great book might contain one or two nuggets as powerful as some of these tips. But 135 all together? This is unprecedented.

I'm confident that, given the limited number of copies we're going to distribute, if **The Secret Book of Free Life Hacks** hit the open market—considering just one of these tips can make you hundreds of thousands a year—the price would quickly get bid up into the stratosphere.

But this book will never be publicly available. Indeed, this is probably your one and only chance to grab your own copy.

And, rather than pay hundreds or even thousands of dollars for this report, I'm asking you for exactly—zero dollars.

In fact, all I want in return for giving you this powerful book is this: Simply sample Walden Publishing's flagship newsletter, *Independence Monthly*.
